

Javascript on button click

1) Added header code in Divi theme option-> integration

2) On home where we want to add button, use code module and add this code:

```
<a class="et_pb_button et_pb_custom_button_icon et_pb_bg_layout_dark termineBtn" href="javascript:toggleDrFlexAppointments()" data-icon="$">Termine online buchen</a>
```

Uses some default and custom classes to do styling of button.

3) Then add css for button style:

```
a.et_pb_button.termineBtn {
```

```
font-size: 15px;
```

```
text-transform: uppercase;
```

```
padding: 15px 32px 15px 14px;
```

```
border: 0;
```

```
}
```

```
a.et_pb_button.termineBtn:after {
```

```
line-height: 1.7em;
```

```
margin-left: 3px;
```

```
font-size: 16px;
```

```
opacity: 1;
```

```
}
```
